Table of Content

- **Introduction**
  - Introduction to SAP HANA
  - ABAP Evolution for SAP HANA
  - Understanding HANA Architecture
  - SAP In-Memory Technology
  - SAP HANA Database Essentials
  - Exploring Row Store and Column Store
  - Database Compression
  - Powering Up with Code Pushdown
  - Data Provisioning Techniques

- **Elevating ABAP with SAP HANA**
  - Introduction to HANA Transformation
  - Optimizing for the SAP HANA Database
  - Planned Optimization Support
  - Enabling ABAP Access to SAP HANA
  - Running ABAP on the HANA Platform
  - ABAP Optimization for Peak Performance
  - Enhancement Package for SAP NetWeaver AS ABAP
  - Seamless Migration of ABAP Code to SAP HANA
  - Performance and Functional Checks

- **SAP HANA Studio or Eclipse**
  - Foundations of SAP HANA Studio
  - Essentials of the HANA Client
  - Navigating Workflow Effectively
  - Exploring SAP HANA Studio Views
  - System Environment: Catalog and Content
  - Diving into SAP HANA Studio Perspectives
  - Modeler Perspective Deconstructed
  - Development Perspective Unveiled
  - Mastering Data Provisioning Editor and Table Administration
  - Administration Perspective: The Insider's View
  - Administering Security with Precision
  - Quick Links and Handy Shortcuts
  - Insight into Native HANA Application Development

- **HANA-Specific Code-to-Data Techniques**
  - Native SQL Utilization with SAP HANA
  - The World of ABAP Database Connectivity (ADBC)

- **Database-Independent Code-to-Data Strategies**
  - Introduction to OPEN SQL
  - Features Fueling OPEN SQL
  - Unpacking New OPEN SQL Syntax

- Exploring Fresh OPEN SQL Features
- Comprehensive List of OPEN SQL Statements in SAP ABAP
- Performance Best Practices for OPEN SQL
- Recognizing the Limitations of OPEN SQL

- **Introduction to Core Data Services (CDS)**
  - CDS in the ABAP Context
  - Live Demo and Showcase of CDS Power
  - Features in CDS View Definitions

- **ABAP List Viewer with Integrated Database Access (ALV IDA)**

- **ABAP-Managed Database Procedures**
  - Understanding and working with ABAP-Managed Database Procedures

- **New ABAP Syntax (SAP NW 7.4 Onwards and 7.5 Features)**
  - Inline Data Declaration Revolution
  - Explicit Type Declaration: Crystal Clear
  - Standard Internal Table Declaration Demystified
  - Deep Dive into Sorted Internal Table Declaration
  - Unveiling Internal Table with More Components
  - Navigating Deep Structures with Finesse
  - MOVE-CORRESPONDING for Internal Tables
  - Table Expressions Deciphered
  - GROUP BY Unveiled for Internal Tables
  - Unveiling FILTER Expressions
  - INNER JOIN: Bridging Data Effortlessly
  - Embracing the NEW Keyword for Object Creation
  - CONVERSION_EXIT_ALPHA_INPUT/OUTPUT: A Deeper Look
  - Using SWITCH Statement for Efficient Coding

- **FUZZY Search Exploration**
  - Introductory Tour of Fuzzy Search
  - Real-Life Examples of Fuzzy Search Implementation
